Instructional Program Review: Fall 2008 Cycle
Core Program and Student Success Indicators

Introduction

The Office of Planning, Research, and Institutional Effectiveness (PRIE) will provide data for 75 academic programs and departments including both those on the annual and comprehensive cycles. These will also include cumulative data for 6 divisions.

Please note: Data will be aggregated into the divisions and departments, as they existed during the academic year 2007/08—prior to reorganization of instructional divisions. An explanatory “Key” will be provided.

Overview
PRIE will provide 3 years of the academic-year data as identified below and one year of students’ demographic data. As indicated by the program review list from the Office of Instruction, data for several programs will be disaggregated and multiple data sets will be supplied for some departments. (For example, art consists of photography, art 2-d, art 3-d, and art history.)

Data Sets
There are 4 data sets for the College as a whole, each division as a whole, and each department or program as indicated on the Program Review list. They include:

Comprehensive 3-Year Look
Academic Years: 2005-6, 2006-07, and 2007-08
- includes core program indicators
- excludes summers
- includes student success and achievement data for the most recent year, disaggregated by ethnicity, gender, and age

Core Program Indicator Data Solely
- 3 years of Fall terms only, 2005, 2006, and 2007
- 3 years of Spring terms only, 2006, 2007, and 2008
- 3 years of Summer terms only, 2006, 2007, and 2008 (where applicable)
