

Family Science Day

Family Science Day drew thousands to CSM in late September. Families and future STEM learners rotated through hands-on experiments, lab demos, and planetarium shows, showcasing CSM's science programs and community partnerships.

Nursing Blood Drive

In partnership with Stanford Blood Center, CSM's Nursing program hosted a highly attended blood drive, filling every appointment slot. This initiative reflects our students' civic engagement and the program's commitment to community health.

Undocumented Student Success Week

CSM's Undocumented Student Success Week kicked off with an author reading and Q&A, and a community mosaic art project, connecting undocumented and mixed-status students to resources, support, and campus allies in order to foster belonging and success.

Advancing HSI Policy

College President, Dr. Manuel Alejandro Pérez, participated in the 2nd Annual Latinx CEO Convening, hosted by Santa Rosa Junior College and sponsored by COLEGAS and Wheelhouse: The Center for Community College Leadership and Research. The gathering focused on statewide HSI policy development, legislative advocacy, and advancing student-centered practices across California community colleges. This meeting of presidents and CEOs reflects our collective commitment to equity, to research-driven decision-making, and to strengthening pathways for Latinx and other historically underrepresented students.

Community Connections

Coastside Outreach at Annual Half Moon Bay Art & Pumpkin Festival

At the Half Moon Bay Art & Pumpkin Festival, CSM Coastside deepened local connections on the campus's first anniversary. Our team staffed a community table and led the parade segment ahead of community partner Ayudando Latinos A Sofiar (ALAS), sharing information on spring classes and services. We promoted Coastside Spring Registration Days—one-stop help with applying and enrolling—reinforcing CSM's commitment to ccessible, high-quality education on the Coastside.
